

D'Shannon's Vortex Generator

ADVANTAGE

Features and Benefits

Features

Benefits

1. A proven and flight tested aeronautical upgrade	High speed efficiency combined with good slow speed & stall characteristics
2. D'Shannon's Vortex generators have long been established as a value added upgrade	D'Shannon VGs allow you to come in for reduced speed landings with shorter rollouts...Plus improved and easier control in an inadvertent unusual attitude.
3. Installation is quite straight forward using D'Shannon's templates and overlays	Acquisition and installation costs are minimized and processes simplified
4. D'Shannon's VGs are approved for all Beech 33, 35, and 36 Bonanza, Debonair and Baron aircraft.	D'Shannon Vortex Generators are PMA'd and STC'd and are approved with 100 pound gross weight increase.
